

Yevhen Ivasiuk

UI/UX DESIGNER

UI/UX Designer specializing in dashboards, SaaS, and mobile product design. Built a mobile app's design system from scratch as sole designer and designed complex B2B dashboard interfaces. Proficient in Figma (variables, components, prototyping); experienced working with PMs and developers on real-world products.

EXPERIENCE

K&Z Design - UI/UX Designer

MAY 2026 – AUG 2026 / Full-time | Remote

- Designed dashboard interfaces for a financial tracking platform: data visualization, charts, complex tables, transaction management, authorization flows, and settings.
- Delivered desktop and mobile UI for an e-commerce product customizer, from concept to dev-ready handoff.
- Designed a B2B platform for the tiling & flooring trade: complex tables, popups, and drawer.
- [Note](#) Features under NDA.

Drippy - UI/UX Designer

MAR 2026 - APR 2026 / Contract | Remote

- Sole designer on a premium mobile app. Delivered 36+ screens from concept to dev-ready Figma handoff. Built design system from scratch (36 Variables, 20 Component Sets, 19 text styles, all semantically named). Solved conversion challenge through partial lock pattern instead of hard-blocking free users. Designed 7 landing hero variants and app icon for iOS & Android.
- [Note](#) NDA until public launch (Q3 2026).

Winwin.travel - UX Designer

JAN 2026 - APR 2026 / Part-time | Remote

- UX designer improving core platform experience. Conducted UX audit identifying key friction points in booking flow proposed redesigned user flows to reduce drop-off. Rebuilt Customer Journey Map based on user behavior data, aligning product team on priority improvements. Worked daily with PMs, designers and developers in cross-functional setup.
- [Note](#) Features under NDA.

PET PROJECTS

System Rezerwacji Wizyt - Public Service UX Redesign

FEB 2026 - JUN 2026 / Bachelor's Thesis Project

- Audited an existing government booking system and rebuilt it as a high-fidelity Figma prototype for usability testing.
- Ran an initial round of usability testing (Maze, Attention Insight) – found an **80.7%** misclick rate and **112s** average task time on a core registration flow.
- Validated the redesign in a second testing round: cut task completion time by 89% on the data-privacy flow, **78%** on queue status lookup, and **62%** on business registration.
- Reduced misclick rate by up to **64%** across tested scenarios, confirming the new information architecture matched user expectations.
